## WORK EXPERIENCE

### Webgarh Solutions Private Limited — FullStack Developer | Full Time

Sept 2022 - Present

Currently, at Webgarh Solutions, I'm working to GoHigh Level (GHL) Application to Agency create invoices to subsequent groups via 360FiveCheckout.

In the past, I worked on a multiple major projects, Here some mentioned below.

#### Sigstore:

- Generate a chatbot for creating an order Less than a minute.
- Technology stack is SIGNAL app (Frontend) & NodeJS (Backend).

#### Emars:

- This project is microservice of existing application Pavillio.com.
- They take all the necessary detail of Nurse, Caregiver & Patient and create encounter.
- Nurse and Caregiver have different panel to operate the flow.

#### Dropship Web Application:

- Dropshipping is a process which show product from one platform to another platform with multiple modifications.
- Key feature of this application is fetch data from shopify and send to own website via shopify API's.
- Webhooks are also implemented to update data when shopify make updations.

#### Bonpetit.se:

- Bonpetit.se is a process of shopify large application.
- In this process, we check the order is placed or not via shopify order webhook.
- If order is successfully placed than modify the inventory from all location that are present is store.
- Main criteria is to update all inventory when order successfully placed.

#### i-Ships:

- i-Ships is a courier service application located in Canada.
- This application picks the package at pickup point and delivers to destination point.
- All orders fetch from Shopify store and also update the tracking URL when order is delivered.
- For tracking package, third-party API used named as "OptimoRoute".
- OptimoRoute provides live tracking to user.

#### Universele:

- This process is based on unique criteria to show foot size with their image.
- In simple words, upload an image and you get the best result of shoes with foot size.
- All APIs hosted on AWS.

#### Single Page Application (Microdesk Corp.):

- This project implemented as a criteria single page application.
- Create a form with all the logical and functional processes work simultaneously when client changes its value.

---

### Entero Healthcare Solution Limited — FullStack Developer | Full Time

January 2022 - September 2022

I've done multiple projects from inception to execution, closely worked with tester, team leader & project managers.

#### CurEver Field Force Project:

- I built the admin panel specially for Sales officer, Area sales manager and Regional sales manager to execute multiple field activities without any hassle.
- Designed different navigations like day plan, Retail call expense, Dashboard and transactions details, etc.

---

### Internshala — Web Developer | Intern

Sept 2021 - Nov 2021

In this internship, I majorly worked on frontend flows, which includes creating a full-fledged admin dashboard, managing user information etc.
